

# FOOD WASTE SYSTEM

The widest range for an integrated  
food waste collection system.

# Food waste as a resource: innovation that transforms circularity into value.

### Quality compost

Free of microplastics  
or other foreign components  
for healthier agriculture

Community  
collection

Home  
composting

Kitchen  
caddies

Kerbside  
solutions

### Composting Plant

Lower management costs  
thanks to the availability of a  
higher-quality organic material

# Trendsetter in waste presorting systems since 1983.

For over 40 years we have been assisting users and operators to improve waste presorting, **innovating the design logic** of waste containers and integrated systems while maintaining **technical, technological, style and design** excellence.

We believe that the study of professional and urban design tools developed according to **eco-design logic** is capable of **engaging and convincing** citizens and operators.

Our strength is excellent teamwork from the idea to after-sales assistance in order to offer a unique value proposition.

## zerømax<sup>2</sup>

zerømax now also available in **recycled HDPE version**:

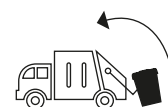

- Greater structural strength ✓
- More suitable for outdoor and intensive use ✓
- Increased impact resistance even at low temperatures ✓

## zerømax

Odour filter

Reflector with integrated RFID System

Front comb receiver

Spherical base  
Easy cleaning and water saving

Smooth tubular air-moulded handle

## Kitchen caddies

The widest range of food waste caddies in different models and capacities currently available for the separate collection of organic kitchen waste, the waste stream that accounts for one third of the total waste per household.

**Umimax 7.5 and 10**

*Vented sides and lid, longitudinal ribs, lower-set hinges*

**Umimax+ 10**

*Bag holding ring, vented sides, base with raised elements to minimize liner contact*

**Minimax 5 and 7**

*Vented or solid lid, matt finish, odour filter*

**Minimax 10**

*Lid-locking clip, odour filter in special grid*

## Kerbside solutions

Products for door-to-door sorted waste collection, designed for spaces close to people, ideal for use in and outside the home. Separating waste as closely as possible to the source where it is generated means greatly increasing the quality of the waste. All models are equipped with lid-locking systems and are available with RFID tags.

**Minimax**

*Available in different capacities and models, customisable*

**zerømax**

*Spherical base, front comb, odour filter*

# Community collection

Elegant housing units with a top-quality finish, made of galvanized and painted sheet steel. Ideal for characterizing public and private spaces, directing end users to a more responsible waste segregation with graphics and colour. Wheeled containers necessary for mechanized emptying are positioned inside, complying with EN 840 standard. Also available with access control.

**Biox 240 / 360**

*High quality finish, soft-closing charging lid, integrated foot pedal, access control*

**MGB 2**

*Two-wheeled bin with bio-filter lid*

**Smart MGB 2**

*Two-wheeled bin with electronic lock*

## ACCESS CONTROL

App Mattiussi Ecologia "ME Recycling"

Magnetic or RFID Mifare card

# Home composting

Eco-design positions Mattiussi Ecologia Composters as revolutionary garden furniture elements, far removed from anachronistic conventional composters, establishing this product both in name and practice as the industry benchmark.

**Composter 300**

*Four easy-to-assemble panels, wind-proof latches on half-lids, slits to facilitate aeration*

**Composter 310**

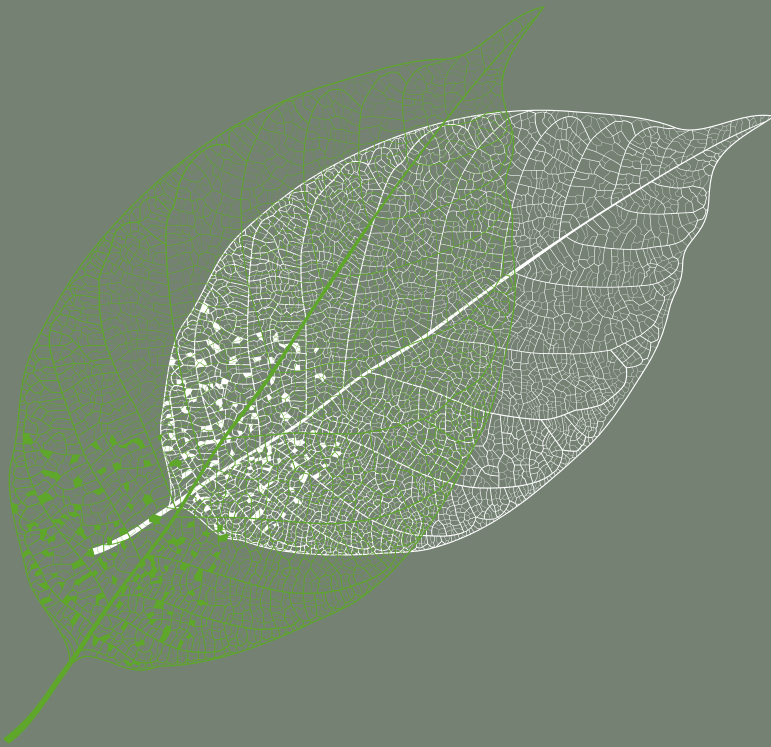

*One-piece body, central cone with non-clogging slits, aerated base for exchange with the ground*

**Composter 660**

*Rapid-lock sectors, aeration slits, special horizontal side slits to prevent rainwater from seeping in*
